

## Reliability DDR4

An Economical Memory Upgrade Solution

Quality Chips Fully Tested For Reliability

Provides Stable & Efficient Performance

# DDR4 Memory Module | P4 Value Series

The P-Series DDR4 DRAM is designed for users who need a cost-effective and dependable memory upgrade. Whether you're upgrading an older system or building a new one, this non-overclocking memory module provides stable and efficient performance for everyday computing, office work, and light gaming, with support for AMD, Intel platforms.

Module Type	DDR4 UDIMM 288 Pin
Speed (MT/s)	3200
Latency	CL22
Voltages	1.2V
Module Capacities	16GB, 32GB
Package	Single and Dual Cannel Kits
On-die ECC	Yes
Dimensions	133.7 x 41 mm
Warranty	Limited Lifetime
