

Superior Performance & Reliable Upgrade

- Up to 3200MHz 1.2V
- High Quality ICs
- Compatible for Intel & AMD mobile Platform

Notebook Memory

ADD GAME DDR4 SO-DIMM | Spider N4

The AddGame Spider N4 DDR4 SO-DIMM is designed with high performance and reliability for Intel/AMD platforms. Offering speeds of up to 3200MHz while operating at a low 1.2V that reduce heat and extends battery life. The Spider N4 is fully complies with JEDEC standards for reliable performance. Not only build with the finest DRAM technology and 100% test under the most stringent conditions but also are compatible with a wide range of notebooks. With both compatibly and stability, it is the best choice for notebook users.

MODULE TYPE	SO-DIMM 260 Pin for Laptop	
TECHNOLOGY	DDR4	
SPEEDS (MHZ)	2666	3200
CAS LATENCY	CL19	CL22
MODULE DENSITY	8GB, 16GB, 32GB	
PACKAGE	Single and Dual Cannel Kits	
VOLTAGE	1.2V	
DIMENSION	30(H) x 70 (L) mm	
OPERATING TEMPERATURE	0°C to 70°C	
WARRANTY	Limited Lifetime Warranty
