

DDR5 Gaming Memory

XMP + EXPO

ADDGAME DDR5 | Spider S5

The AddGame™ Spider S5 is a high-performance overclocking memory designed for DDR5 Platform, boasting speeds up to 6400MHz. Featuring top-quality DDR5 ICs and a premium aluminum heatsink for efficient heat dissipation, ensuring excellent performance and reliability under most demanding conditions. It is compatible with Intel's 12th and 13th generation processors as well as AMD's Ryzen 7000 platform, making it an ideal choice for gamers and PC enthusiasts. Furthermore, the memory supports XMP 3.0 and EXPO one-click overclocking features, enabling users to achieve optimal performance without manual tuning.

SPIDER S5 (Intel/AMD) SPIDER S5 (Intel)

Module Type	DDR5 UDIMM 288 Pin	
Speed (MHz)**	4800*, 5600, 6000	6400
Latency	CL38, CL40	CL38
Voltages	1.1V, 1.2V, 1.3V	1.3V
Capacity	8GB, 16GB, 32GB, 64GB	
Package	Single and Dual Cannel Kits	
Heatsink	Superior Aluminum heat spreader	
Overclock Feature	XMP, EXPO	
On-die ECC	Yes	
Dimensions	133.7 x 41 x 7.7 mm; 41mm Height	
Warranty	Limited Lifetime	
Compatible Platform	AMD 600 (Ryzne 7000 CPUs) Intel 600 (12th Gen Core CPUs) Intel 700 (13th Gen Core CPUs)	Intel 600 (12th Gen Core CPUs) Intel 700 (13th Gen Core CPUs)

Made in Taiwan

Note
 * This DDR5-4800 Memory kit cannot be overclocked using Intel XMP or AMD EXPO.
 ** To achieve the Advertising Speed, need to enable the XMP or EXPO profile in the BIOS
